Other Hazards Not Resulting in Classification: Mica may contain small quantities of quartz (crystalline silica). Prolonged exposure to respirable crystalline silica dust at concentrations exceeding the occupational exposure limits may increase the risk of developing a disabling lung disease known as silicosis. IARC found limited evidence for pulmonary carcinogenicity of crystalline silica in humans. In the case of normal use of this product, exposure to silica should be nil.

The attapulgite clay used in this product has a fiber length of less than 5um; therefore, the clay is not considered to be carcinogenic to animals or humans.

Adverse health effects and symptoms:

A mild irritant to the respiratory system, eyes, and skin. Symptoms may include coughing, shortness of breath, and irritation of the lungs, eyes, and skin. Ingestion, although unlikely, may cause gastric distress.

# Section 4. FIRST AID MEASURES

Eye Exposure: Causes irritation. Irrigate eyes with water and repeat

until pain free. Seek medical attention if irritation

continues, or if vision changes occur.

May cause skin irritation. In case of contact, wash Skin Exposure:

with plenty of soap and water. Seek medical attention

if irritation persists.

May cause irritation, along with coughing. If Inhalation:

respiratory irritation or distress occurs remove victim

to fresh air. Seek medical attention if irritation

persists.

Ingestion: Overdose symptoms may include numbness or

tingling in hands or feet, uneven heart rate, paralysis,

feeling faint, chest pain or heavy feeling, pain

spreading to the arm or shoulder, nausea, sweating,

general ill feeling, or seizure (convulsions). If victim is conscious and alert, give 2-3 glasses of water to drink. If conscious, do not induce vomiting. Seek immediate medical attention. Do not leave victim unattended. To prevent aspiration of swallowed

product, lay victim on side with head lower than waist.

Medical conditions possibly aggravated by exposure:

Inhalation of product may aggravate existing chronic respiratory problems such as asthma, emphysema, or bronchitis. Skin contact may aggravate existing skin

disease. Chronic overexposure may cause pneumoconiosis ("dusty lung" disease).

# Section 5. FIRE-FIGHTING MEASURES

Not flammable Flammable Properties: Flash Point: Not determined Suitable Extinguishing Media: Non-combustible. Use extinguishing media suitable

for surrounding conditions.

Hazardous Combustion Products:

**Explosion Data:** 

Sensitivity to Mechanical Impact: Not sensitive Sensitivity to Static Discharge: Not sensitive

Unusual fire/explosion hazards: In a fire this material may decompose, releasing

oxides of carbon, potassium and nitrogen, and CO2

(see Section 10).

Carbon oxides

Protective Equipment and

Precautions for Firefighters: As in any fire, wear self-contained breathing

apparatus (pressure-demand, NIOSH approved or

equivalent), and full protective gear.

### Section 6. ACCIDENTAL RELEASE MEASURES

Personal Precautions: Avoid contact with skin, eyes, and clothing. Personal Protective Equipment: Minimum - safety glasses, gloves, and a dust

respirator.

Emergency Procedures:

Methods for Containment: Prevent further leakage or spillage if safe to

do so.

NA

Methods for Clean Up: Avoid dust formation; clean up released material

using vacuum or wet sweep and shovel to minimize generation of dust. Bag and transfer to properly labeled containers. Ventilate area and wash spill site

after material pickup is complete.

Other: If product is contaminated, use PPE and containment

appropriate to the nature of the most toxic chemical or

material in the mixture.

# Section 7. HANDLING AND STORAGE

Personal Precautions: Use appropriate PPE when handling or maintaining

equipment, and wash thoroughly after handling (see

Section 8).

Conditions for Safe Storage/Handling: Keep product in original container or extinguisher.

Prevent falling. Do not allow near heat sources. Contents may be under pressure – inspect extinguisher consistent with product labeling to

ensure container integrity.

### <u>Personal Protective Equipment – PPE Code E:</u>

The need for respiratory protection is not probable during short-term exposure. PPE use during production process must be independently evaluated.

Eye/Face Protection: Skin and Body Protection: Tightly fitting safety goggles Wear protective gloves/coveralls Respiratory Protection: If exposure limits are exceeded or irritation is

experienced, NIOSH approved respiratory protection should be worn. Use P100 respirators for limited exposure, use air-purifying respirator (APR) with high efficiency particulate air (HEPA) filters for prolonged exposure. Positive-pressure supplied air respirators may be required for high airborne contaminant concentrations. Respiratory protection must be

provided in accordance with current safety and health requirements. The need for respiratory protection is not likely for short-term use in well ventilated areas. Good personal hygiene practice is essential, such as

avoiding food, tobacco products, or other hand-tomouth contact when handling. Wash thoroughly after

handling.
